

CONTENTS

N. N. Kovalev and A. K. Kozakov	1	The 6th (Electrotechnical) Section of the Russian Technical Society -- Forerunner of the Energetics and Electrotechnical Industry Technology Society (EITS)
V. A. Pugachev	11	Analysis of electromagnetic coupling between mutually orthogonal loops in a nonlinear ferromagnetic medium
A. V. Ivlev, A. S. Kibardin, A. V. Komin, V. G. Kuchinskii, K. M. Lobanov and Yu. A. Morozov	24	An inductive store with electromagnetic current multiplication
A. I. Chagrov	34	Analytic method for performance analysis of an electromagnetic pulse shaping distributor
	42	U.S.S.R. State Prizes 1979
I. A. Glebov, Ya. B. Danilevich, V. I. Iogansen, I. A. Kadi-Ogly, V. P. Chernyavskii and A. B. Shapiro	45	Entirely water-cooled 800 MW 3000 r.p.m. turbogenerator
G. N. Aleksandrov, V. L. Ivanov, G. D. Kadzov, V. A. Parfenov, L. N. Pakhomov, V. Yu. Petrun'kin, V. A. Podlevskii and Yu. G. Seleznev	59	Scope for more effective lightning rod protection by laser spark
A. I. Yakobs and T. T. Konobeeva	65	Allowing for non-equipotentiality of earthings in calculating their electric parameters
M. L. Levinshtein, G. I. Samorodov and E. A. Diakovskii	69	Increase of power system dynamic stability by resistors in transformer neutral
B. M. Antonov and E. I. Sluchanko	82	Methods for valve converter investigation under non-zero initial conditions
G. N. Kitaev, M. I. Gol'dshtein, V. N. Morozov and A. V. Zubrilin	96	Discharge characteristics of large asymmetrical air gaps
D. V. Kholmiskii and B. N. Vaneev	104	Referred expenditure and power system reliability
	111	Abstracts of papers not translated from <i>Elektrichestvo</i> Nos. 1-3, 1980

CONTENTS

F. I. Sin'chugov	1	Fundamentals of power system reliability
V. F. Sivokobylenko and V. I. Kostenko	11	Mathematical modelling of deep-slot asynchronous machines
A. S. Maikopar	21	Study of foulability of smooth insulators in desert conditions
V. A. Avrutskii and G. V. Naimark	25	Spiral generator design
N. V. Shilin	32	Oil circuit breaker recovery strength in arc quenching
V. A. Labuntsov	45	Technological problems in power conversion
Yu. V. Shcherbina, V. P. Melnik and I. G. Roitelman	53	Power system modelling for selection of automatic frequency load-shedding
Sh. I. Lutidze, Yu. I. Lagvilava and T. K. Kokhraidze	64	Study of electromechanical transients in a submersible motor with rotor asymmetry
G. N. Aleksandrov, A. I. Polevoi and I. F. Polevoi	74	Motion of overhead line bundle conductors during short circuits
V. A. Zherebtsov and M. D. Stolyarov	90	Calculation of means of protection from electric field ecological effects
Yu. E. Gurevich and L. F. Kudryavtseva	104	Obtaining probability estimates of complex power system dynamic stability
N. P. Maksimov and S. L. Stepanyants	114	Frequency transfer function for ore-reduction furnace control system research
	122	Abstracts of papers not translated from <i>Elektrichestvo</i> Nos. 4-6, 1980

CONTENTS

	1	100 Years 1880–1980
P. S. Neporozhnyi	6	Propagandist and medium of Lenin's ideas on nationwide electrification
E. S. Lukashov	10	On the motion of the centre of inertia of a power system
Yu. G. Shakaryan, R. S. Tsgoev, L. A. Sukhanov and R. Kh. Safiullina	19	On operating conditions of large doubly-fed asynchronous machines in a power system
V. M. Chornogotskii, L. P. Dzhun' and A. F. Maksimtov	30	Electric strength of power transformer intercoil insulation
V. D. Il'in, B. N. Kurov and A. G. Batalov	42	Program package for identification and operative analysis of power flows in inter-system sections of power interconnections
V. G. Avvakumov and A. M. Volotskii	48	Stability regions in optimising the quality of energy
A. A. Fedorov, V. V. Kameneva, A. I. Chernusskii, E. D. Stebunova and S. T. Siderov	57	Need for 20kV voltage in industrial and urban distribution networks
E. A. Meerovich, L. A. Nazarov, G. Kh. Karabaev and B. P. Kokurkin	62	Measurement of high-voltage line currents by their magnetic fields
D. A. Arzamastsev and V. M. Letun	85	Determination of hydro-thermal power system economy of operation
A. A. Fedorov and G. P. Kornilov	97	On use of compensators in systems supplying large nonlinear loads
N. N. Blotskii, E. L. Bronshtein, S. O. Dasheev, L. G. Mamikonyants M. E. Temizhev, R. S. Tsgoev and Yu. G. Shakaryan	107	Electrodynamic model tests on an electro-mechanical frequency changer for flexible coupling of electric systems
	117	Abstracts of articles not translated from <i>Elektrichestvo</i> , Nos. 7–9, 1980

CONTENTS

	i	Preface by Editorial Board U.S.S.R.
S. A. Sovalov and V. A. Barinov	1	Power system steady state mathematical models
G. M. Khutoretskii, V. V. Gorodetskii and Yu. S. Zubkov	18	Specificities in developing automated design systems for large electric machines
S. I. Kitsis	31	Asynchronous self-excited generator transients in sudden three phase short circuits
A. K. Chernovets, G. V. Merkur'ev, A. A. Solonenkin and D. Goldmann	48	Response and selectivity in large turbo-generator excitation loss detection
E. A. Meerovich and K. M. Chal'yan	64	Screening in large three phase conductor systems with screens arranged in different connections
L. I. Glukhivskii	73	Fundamentals of a differential harmonic method for analysis of periodic processes in nonlinear circuits
E. G. Feinstein and V. G. Feinstein	89	Simplified sampled-data model of a valve converter for automatic control
S. Iliev	105	Estimation of power system dynamic behaviour
V. I. Efremov and V. P. Tyurin	112	Appraisal of parametric reliability of traction drive electronic systems by nonlinear physical modelling
V. Ya. Ushakov, V. M. Muratov, V. V. Lopatin, N. K. Kapishnikov, V. R. Kukhta and A. I. Shemyakin	123	On insulator shape optimisation for high-voltage impulse devices with aqueous insulation
S. A. Abasov, M. A. Kurbanov, T. M. Believ, U. A. Kabulov, Elmira Dzhalal Kyzy and S. Sh. Bedir Khanova	130	Durability study of polytetrafluorethylene in liquid nitrogen medium
	135	Abstracts of papers not translated from <i>Elektrichestvo</i> Nos. 10-12, 1980
